

Dear Client,

First of all, we would like to thank you for giving us the datasets during the processing of your dataset we get the following information:

	No of records	Unique IDs	Receiving Date
Transaction Dataset	20002	3495	08/05/2022
Customer demographic	4002	4002	08/05/2022
Customer Address	4002	4001	08/05/2022

Issues related to Datasets:

- 1)Additional customers ID in Transaction dataset, maybe there is a problem of data loss.
- 2)Various columns such as brand values have empty values.
- 3)Inconsistent data type with the same attribute.
- 4)Inconsistent data values with the same attribute.

“We are moving for further processes like data cleaning, standardisation etc. and it will be great to spend some time with your data”.

Regards,
AAYUSH ANAND
